## **DETAILED ACTION**

### ***Election/Restriction***

Applicant's election with traverse of species I in Paper No. 5 is acknowledged. The traversal is on the ground(s) that the examiner has not alleged any burden to examine the plural species in a single invention. This is not found persuasive because the office allows a reasonable number of species to examine in an application. However, eight species would create a burden to search.

The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-7, 9, 10, 21 are rejected under 35 U.S.C. 102(b) as being anticipated by

Murakami.

Murakami discloses a metal foil (9) and a metal plate (2), protrusion or rib (8) being fitted into a hole (4)(Fig 6) (re claims 1, 9, 10, 21).

Re claims 2, 3, 6, wherein the protrusion is formed by rolling an edge of the metal foil or bending an edge of the metal foil (Fig 6).

Art Unit: 2831

Re claims 4, 5, a screw (10).

Re claim 7, the limitations of "drawing process" have been considered, but does not result in a structural difference. The presence of process limitations in product claims, which product does not otherwise patentably distinguish over prior art, cannot impart patentability to that product. In re Stephens 145 USPQ 656 (CCPA 1965).
